PURPOSE

This conference is designed to celebrate 25 years of organ donation and transplant. The conference will help to increase awareness among healthcare professionals and members of the community of the critical need for organ and tissue donation for transplantation and research.

COURSE OBJECTIVES

Upon completion of this course the participant will be able to:

- Describe how organ and tissue donation has changed over the past 25 years.
- Discuss the “push” to increase the availability of eligible donors.
- Describe how the team approach has improved the process of donation from recovery to transplantation
- Recognize how the progress made in recovery and transplantation procedures has had a positive impact on the lives of the recipients.
